

UNMASK THE TASK

CONTENTS

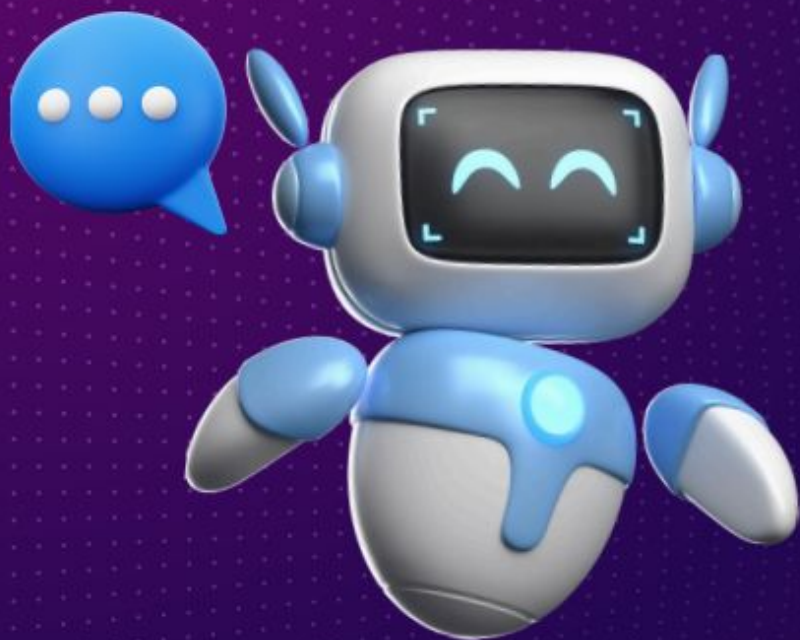

- ① Strategy to crack a job task.
- ② Importance of polishing
- ③ Carefulness in submission

STRATEGY TO CRACK A JOB TASK

- Requirement analysis.
- Breaking down the task into different parts.
- Priority setting on requirements.

MAKING DEVELOPMENT
WORKFLOW PLAN.

DEVELOPING AND TESTING.

DEPLOYING.

DOCUMENTATION & SUBMISSION

REQUIREMENT ANALYSIS

Reading the job task thoroughly
few times.

Listing down the main
requirements and optional
requirements.

Listing down the technologies
/packages required.

○ Breaking down the task into different parts

- Keep the deadline in mind.
- Break down the task into different parts.
For example: Client side, Server side, API.
- Set deadline for the completion of each part.

PRIORITY SETTING ON REQUIREMENTS

- Create priority hierarchy for each part of the task.
- Prioritize the most important parts first.
- Focus on main requirements.
- Implement the optional requirements.
- Implement some extra features if possible.

⑤ MAKING DEVELOPMENT WORKFLOW PLAN

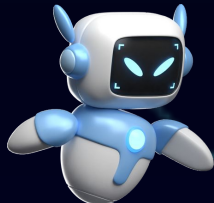

- Plan the workflow for the development.
- Development environment setup
- Don't forget to add necessary things in .gitignore
- Create a repository and connect.
- Focus on a single part at a time

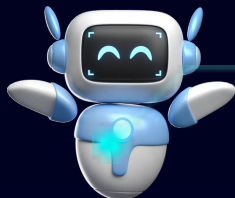

DEVELOPING AND TESTING

KEEP THE DEADLINE IN MIND.

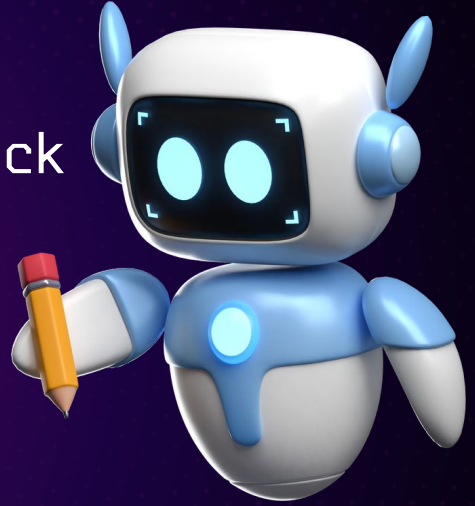

TRY IMPLEMENTING BEST PRACTICES

TEST EACH FEATURE AFTER
IMPLEMENTATION.

Deploying

- Deployment setup for each platforms.
- Complete one part and deploy it to check issues in production.
- Developing and deploying should be simultaneous.
- Check for accessibility issues for domains.
- Make sure to put the credentials of .env in the hosting platform.

DOCUMENTATION

- Decorate the repository with necessary information.
- Enhance the readme.md file:
 - Brief overview of the project.
 - Main features.
 - List of main technologies used.
 - List of the dev dependencies.
 - Live site link.
 - Instructions on how to run the project on local machines.

SUBMISSION

List down the required links.

Make sure the links are public or accessible to the recruiter

Don't forget giving credentials if there are any

IMPORTANCE OF POLISHING

- Standing out from the crowd.
- Showing you mean business.
- Give them reasons to choose you over others.
- Compensate your qualification gap (if there is any) with the quality of your work.
- Leverage for negotiation.

CAREFULNESS IN SUBMISSION

- Make sure all the required links are submitted.
- Make sure all the links are visible or accessible to the recruiters.
- Don't forget your communication skills in emails or other mediums of communication
- Don't forget to provide the credentials that the recruiter might need to test the project.

BONUS TIPS

- Instructions on how to run the Try to do more than 100%.
- Try to maintain professionalism in every part of the process.
- Fasten your seatbelt for rejections because what does not kill you makes you stronger.
- Maintain good communication with the recruiter even after rejections.
